INTERNSHIP

Python Trainee
Lise Infotech
📅 June 2022 – December 2022

- This internship program allowed me to work on real world tasks that are carried out by the developers in Lise Infotech for their client projects.
- In this internship I gain industry based knowledge.I collaborated with a team to conduct research development on the project.
- Executed test cases for eCommerce website for car enthusiasts.

Campus Ambassador
Internshala
📅 April 2021 – June 2021

- I stood 565 out of 21,963 students selected from different colleges across India.
- Internshala Student Partner 22 (ISP) is a 70-day transformational work-from-home program aimed at building the leaders of tomorrow.
- During this program, I promoted Internshala and its products successfully and showed genuine sincerity and willingness to learn while taking on new assignments and challenges.

SPECIALIZATIONS & COURSES

- Google IT Support Specialization - **Google**
- Python for Everybody Specialization - **University of Michigan**

PROJECTS

Weather app

- My weather app provides users with reliable and informative weather data in a user-friendly interface, making it an essential tool for anyone looking to stay informed about the weather.
- I implemented features such as geolocation, allowing users to receive weather information for their current city, as well as a search function for users to look up weather information for any city around the world.
- I've integrated a third-party API, In order to display accurate weather data.

Password Generator

- This password generator is a tool that generates random passwords, based on parameters you provide. This means that you can instantly generate a secure, random password as soon as you input your parameters.
- Password Generator uses the Clipboard API to write the generated password to the clipboard.

Productivity App

- This Productivity App helps you to keep track of your day-to-day tasks in a simple and effective way.
- This To-Do App is built using JavaScript that handles simple Create, Read, Update and Delete operations.

TECHNICAL SKILLS

- **Programming:** HTML/CSS, Tailwind CSS, C, Python, JavaScript, SQL, Postman, Git and Github.
- **Operating Systems:** Linux, Windows, macOS
- **Tools and Softwares:** Visual Studio Code, Pycharm, Jupyter Notebook, CodeBlocks, Latex and Sublime Text Editors

HONORS & AWARDS

- Successfully completed participating in **The Guinness World Record Event** - Most users to take an online computer programming lesson in 24 hours (2021).
- **Second position** in Cricket Tournament organized during Inter-College Sports fest (2019).
- **Outstanding Student leader** (2017/18) by ILVA Commerce and Science College for leadership and dedication towards campus community.

SOFT SKILLS

- Team Player.
- Adaptability
- Willingness to Learn.
